EAOS freight wagons

Gondola cars were manufactured by all countries of the eastern block. We modelled the ones made in Poland by the Zielona Gora factory from the late 60's. All original cars had 3 pairs of two-wing flap doors and ORE bogies. They were delivered with both rigid and rotary front sides. They were originally used by PKP and MÁV only.

Later most of these wagons were converted into 4-door cars by removing the middle doors. Many of the original ORE bogies were replaced by Y25 bogies. We can model different variations:

- 4 doors or 6 doors;
- ORE, ORE-V or Y25 bogies;
- 8 different door designs;
- 6 different front sides (rigid and rotary).

Combining the above parameters we get a great variety of models, which is reflected in our production: more than 20 different versions have been released and the number keeps increasing.

Many of these aging wagons were sold to private railways in Slovakia, Czechia, Germany, Austria, Hungary and Poland but some examples can be found in Romania as well. This has given us ample opportunities to release many different liveries using all colours of the rainbow.

ALBERT MODELL

About us

The history of our company

Established in 2014, Albert-Modell has swiftly emerged as a known name in the world of model railway manufacturing. Our international presence, which commenced in 2017, marks a significant milestone in our journey. At Albert-Modell, our primary focus rests on producing exquisitely detailed models of Eastern European freight wagons, alongside an impressive range of diesel locomotives, but our range includes more and more models from countries like Germany and Switzerland.

Our philosophy is anchored in the belief that model-making is an art that demands precision, detail, and affordability. We strive to blend these elements, offering our clients high-quality, intricately designed models at a price that respects their passion and investment in this hobby.

Our products are crafted not merely as toys, but as collectibles, with a dedication to craftsmanship.

We pride ourselves on producing models in limited quantities, ensuring that each piece we create is not just a model but an elegant representation of the original. This approach underlines our commitment to quality over quantity, making our models sought-after items for collectors and enthusiasts who value exclusivity and authenticity.
